

## INFANT ROOM SUPPLY LIST

- 4 Boxes of Kleenex
- Diapers, Wipes, Ointment
- 4 Extra Sets of Clothes (size appropriate and seasonal)
- 3 Sippy Cups (when ready)
- 1 Plastic Bib
- 1 Gallon of Water
- Formula, Breastmilk, or Baby Food
- Bottles pre-made and ready to be warmed labeled with their name and the date
  - Formula – Bottles must be pre-made and there must be enough food for your child for the full day i.e. from drop-off until the school closes at 5:00 p.m. even if you plan on picking up your child early.
  - Breastmilk – Can be stored in our refrigerator for up to one week frozen or up to 24 hours for milk that has been previously thawed. Any frozen breast milk left over will be sent home at the end of the week.
  - Baby Food – Can be stored for one week if unopened. Open food is good for one day.

**\*\*Please bring one bottle for each feeding\*\***

**Babies who are eating cereal and baby food, must first be introduced at home.**

### **Teething**

When babies start teething it hurts. If you would like for us to give Infant Tylenol or Motrin (over the age of six months) to ease pain, or Orajel, a **MEDICATION** form signed. Medications must be in the original container with a pharmacy label attached and the child's full name, directions, frequency, dosage, and expiration date.

**Teething does not cause high fevers or colds.** Your baby's resistance may be lowered during teething, but it does not cause infections. They may show the following symptoms:

- Irritability and crankiness
- Refuse the bottle (sucking hurts)
- Drooling
- Rashes around the mouth
- Loose stools
- Swollen, red gums
- Diaper rash
- Clear, runny nose
- Loss of appetite
- Biting fingers, toys, etc.
